

## Examination table, weight load 250 kg 80 cm wide

Article no.  
**A5-011-8551**

The examination table that can take a weight load of 250 kg has been developed and designed in consultation with health-care professionals with an emphasis on functionality, user-friendliness, patient comfort and quality.

### Electrically adjustable

Height, backrest and trendelenburg are all electrically adjustable.

### Chassis

The sturdy white coated chassis is made from steel pipes and has four lifting points, making the table very stable.

### Castors

125 mm central locking castors.

### White plastic cover

Protects the motor, makes cleaning easier and has a built-in space for storage.

### Motor

220-240 V / 24V. Battery power is available. Choose between hand control, as standard (24 V), and foot control (24 V).

### Foam pads

80 cm wide. 6cm padding, covered with a high quality leather-like material and provides high comfort. The upholstery is available in a wide variety of colours to suit the colour scheme of the room. Beige, light blue and eggshell are standard colours; other colours are available for an additional cost.

### Specifications
