

## IV stand Violetta

- Collapsible
- Only 3 kg weight!
- Easy AND light to carry!
- Practical to transport!
- Ideal for home care!
- Could be stored hanging!

TARSUS proudly presents **Violetta**, the collapsible IV stand!

Violetta is nothing less than a home care revolution.

Much of the equipment used in medical home care is best suited for hospital environment, and is therefore mostly hard to transport and not at all suitable for the home care environment.

One item often used in home care is the IV stand.

Violetta, collapsible to only 1/3 of its full length, is made of aluminum and weighs therefore only 3kg.

No more hopeless handling of heavy, bulky steel IV stands, in and out of cars, up and down stairs.

It has never been easier to store an IV stand. With Violetta, floor space is freed, which makes cleaning so much easier.

Storage-wise, Violetta is a dream come true for planners of new medical centers and hospital units, being so easily stored hanging and available in very interior-friendly colors. No need to hide an item as good looking as Violetta.

### Violetta – tomorrows' IV stand today!
