

2-sectioned patient and emergency trolley

For emergency and other patient transport.
Designed in consultation with hospital professionals for maximum patient comfort, user-friendliness and ergonomic design.

Chassis

Chromium-plated high quality all-welded steel tubes, stable construction. Easy adjustments and a low minimum height and high maximum height make the table both patient and user friendly, providing maximum accessibility and a correct ergonomic working posture. A bumper wheel in each corner and mounting rails are included.

Top

2-sectioned with corner bumper wheels and a handle at the foot side end.

Trendelenburg

Variably adjustable by gasspring.

Backrest

Variably adjustable by gasspring.

Handle and basket included.
