

Convertible chair/table for taking blood-tests

The chair/table is designed in consultation with hospital professionals for maximum patient comfort, user-friendliness and ergonomic design. Electric adjustment of height and of backrest /trendelenburg position. Stable and compact construction makes the taking of blood-tests safe and makes it easy to find a suitable place for the chair/table in the room. Stable and adjustable armrests.

Frame

Chromium-plated or epoxy coated frame. All-welded high-quality steel tubes. Stable construction with four points of lifting. Low minimum height and high maximum height make it easy for the patient to get on and off the chair/table and provide accessibility and an ideal working level.

Backrest

Electrically adjustable. The motor is disengaged if the backrest for instance hits against a wall when lowered, which guarantees safe adjustment.

Leg section

The leg section is folded up and locked in horizontal/trendelenburg position with a manual lock.

Armrests

Very stable, concave arm rests, fully and easily adjusted. The arm rest pad can be turned and used on both sides. The arm-rests are also adjustable along the accessory mounting rail. Can be removed easily, which facilitates disabled patients' transfer from a wheelchair or a bed.

Patient handgrips

Stable patient handgrips make it safe for the patient to get on and off the chair/table. Can be removed easily and are adjustable along the accessory mounting rail.

Pads

Foam-filled pads covered with imitation leather provide excellent comfort. Available in a large selection of colours that can be matched to the examination room decor. Beige and light blue are standard colours. A guardrail protects the pads against damage.

Plastic cover

For easy cleaning of the frame.

Wheels

Two fixed 100-mm castors in the front. Two locking 75-mm swivel castors in the back.

Motors

220-240 V. Foot control (24 v) is standard. Available with battery backup.
