

## Sack- and laundry-bag holder

For 30-, 60- and 125-litre sacks

### Lid

Lid made of coated fabric that shuts silently and eliminates risk of pinching fingers. The lid has a hygienic design, shuts closely round the bag holder ring, and is easily removed for cleaning. Red is standard colour and other colours are available. The bag holder is also available with an epoxy-coated metal lid.

### Stand

All-welded chromium-plated tubular steel stand. Equipped with a stop to keep the lid from hitting the wall. The clamp ring has a friction brake that keeps it held up and eliminates the risk of pinching fingers when changing bags. The bag-holder ring can also stay tipped up, which makes the changing of bags easier and more hygienic. It is equipped with four nibs to keep the bag firmly in place.

### Wheels

The bag holder is available with other castors than those listed below, for instance with anti-static castors. The two-wheel version has two supporting legs with plastic feet in the front.

Wall version bag holder. Is fixed to the wall.

### Bag holder with lid and foot pedal

#### Item.No
