

## Three-part examination table

The table is designed in consultation with hospital professionals for maximum patient comfort, user-friendliness and ergonomic design. It is ideal for instance for EEG-examinations (hydraulic version), where a three-part table may be preferred. Electric or hydraulic adjustment of height are available.

### Frame

All-welded steel tubes. The frame has a stable and compact construction with four points of lifting. Easy adjustments and a low minimum height together with a high maximum height make the table both patient- and user-friendly providing maximum accessibility as well as an ideal working level. Electric or hydraulic adjustment of height. A paper dispenser and a tear-off edge for cutting the paper are included.

### Backrest

Variable adjustment by means of a gas-spring.

### Seat section

Variable adjustment by means of a gas-spring.

### Leg section

Variable adjustment by means of a gas-spring.

### Trendelenburg position

Variable adjustment by means of a gas-spring.

### Pads

Foam-filled pads covered with imitation leather provide excellent comfort. Available in a large selection of colours which can be matched with the examination room decor. Beige and light blue are standard. The top has a guard-rail that protects the pads against damage.

### Wheels

Four central-locking 125 mm castors, one castor locking in direction to facilitate transfer.

### Motor

220-240 V. Hand control (24 v.), standard.

Foot control (24 v.), accessory. Available with battery backup.

### Hydraulic pump

Operated with a foot pedal.

### Positions
