

Heart & carotis Ultrasound Table

Electric or hydraulic adjustment of height. The table is designed in consultation with hospital professionals for maximum patient comfort, user-friendliness and ergonomic design.

Frame

Chromium-plated. High-quality, all-welded steel tubes. Stable construction. The possibilities for simple adjustment and a low minimum height together with a high maximum height make the table both patient- and user-friendly, providing maximum accessibility as well as an ideal working level. A paper dispenser, a tear-off edge and accessory mounting rails are included.

Cut-out section

The foldable cut-out section is easily fastened under the backrest section during heart examination. Folded back the cut out section makes the table flat.

Back-support

As an accessory a side-mounted back-support that is adjustable makes it easy to place the patient in the best ergonomic position.

Headrest

A headrest for examination of carotis is available as an accessory.

Back rest

Variable adjustment by means of a gas-spring. Electric motor as an option with the electrical version.

Trendelenburg position

Variable adjustment by means of a gas-spring. Electric motor as an option with the electrical version.

Pads

Pads covered with imitation leather provide excellent comfort. Available in a large selection of colours that can be matched with the examination room decor. Beige and light blue are standard colours. The top has a guard-rail that protects the pads against damage.

Storage/Plastic cover

The plastic cover is a storage box and makes cleaning easier.

Motor

220-240V. Available with battery back up. Hand control is standard, foot control as an accessory, both running on 24 V.

Hydraulic pump

Operated with a foot pedal.

Dimensions and specification

Length 195 cm, width 70 cm (standard), height 53-91 cm.
Back rest: length 75 cm, angle +64°.
Trendelenburg position angle -14°.
Weight: 68 kg.

Wheels

Four 125 mm castors, two locking, one direction locking and one unbraked. Central-locking 125 mm castors with one direction-locking castor as accessory.
