

Emergency and patient trolley

For emergency and other patient transport. Designed in consultation with hospital professionals for maximum patient comfort, user-friendliness and ergonomic design.

Chassis

Chromium-plated high quality all-welded steel tubes, stable construction. Easy adjustments and a low minimum height and high maximum height make the table both patient and user friendly, providing maximum accessibility and a correct ergonomic working posture. A bumper wheel in each corner and mounting rails are included.

Back rest

Variably adjustable, gas spring regulated. Steering handle on the back rest.

Trendelenburg position

Variably adjustable, gas spring regulated.

Height adjustment

Foot pedal operated hydraulic pump

Mattress

Black and green are standard colors, other colors available. 50 or 100 mm thick. One side of the mattress has an anti friction surface, the other a friction surface.

White cover / Storage

The white cover could be used as a storage space, its design makes cleaning the trolley easier.

Chrome plated basket

Available as an accessory.

Castors

Central locking easy roll 150mm castors, one with direction locking to facilitate easy transfer.

Safety side rails and IV stand.
