

## X-ray table

for lung x-ray

Our X-ray table is designed in consultation with health-care professionals with an emphasis on functionality, user-friendliness and quality. Electrically adjustable.

### Chassis

White powder-coated chassis, chromium-plated lifting arms. All-welded high quality steel tubes. Sturdy construction, four lifting points. Low lowest position, which makes the table patient-friendly.

### Castors

Central locking white 125 mm castors, one directional locking.

### Middle section

Electrically adjustable, 10 cm.

### White protective cover

Protects the motor. Its form helps when cleaning the table.

### Motor

220-240 V / 24V. Battery back-up available. Hand control (24 V) is standard, foot control (24 V) an option.

### Pads

Polyeter pads, comfortable, artificial leather cover. A wide variety of colors available, to match the room decor, beige, egg-shell and light blue are standard. Other colors available for a price supplement. The chromed frame protects the pads.

### Dimensions

Total length: 195 cm

Length middle section: 35 cm. Electrically adjustable 10 cm.

Width: 70 cm

Table height: 53-91 cm.

Weight: 65 kg
