

Policlinic table

Electric adjustment of height, manual adjustment of backrest, Trendelenburg and headrest.

Chassis

All-welded chromium-plated steel tubes. The pad rests on a 4 mm plastic sheet. Very sturdy construction with four lifting points.

Designed to reach a generous maximum height, 112 cm, which provides for accessibility and an ideal work posture.

Backrest

Manually and variably adjustable.

Trendelenburg

Manually and variably adjustable.

Headrest

Manually and variably adjustable.

Pad

All-welded, with antistatic coated fabric filled with a 40mm foam plastic.

Accessory mounting rails

Included. Mounted on both sides of the table.

Cover/storageage

The plastic cover has an integrated storage area, its design helps when cleaning.

Motor

220-240 V/24 V. Battery backup is available as option. Both foot and hand controls are included.

Castors

125mm central locking castors, one with a directional locking mechanism.
