

Blood sample chair electric on column

Chassis

All-welded powder-coated steel chassis. Electrically adjustable on pillar motor, very sturdy and stable construction.

The chair regulates from sitting to Trendelenburg positions in one push of a button.

Leg Plate

Electrically adjustable.

Armrests

Adjustable in angle by gas springs. Manual adjustment of height, sideways and along the accessory rails.

The armrests may also be removed fully from the chair, which helps greatly if a patient is to be transferred from a bed or a wheelchair.

Patient handles

Chromium-plated, adjustable along the accessory rails. Removable.

Motors & Controls

220-240 V, hand and foot controls (24 V) is included. The foot controls are placed above the floor on the chair.

Pads

Foam plastic filled, artificial leather cover available in a number of colors to match the room decor.

Castors

100 mm central locking castors included. Helps to move and rotate the chair.

Warranty

2 years.

Neck cushion

The neck cushion (included) is very comfortable and may be adjusted up and down as well as be removed fully.
