# Sinne-bêdsje

3144/3145 (NEN 716-1/2, DIN 32623)

## The child-friendly children's bed

Modern technologies, applied cleverly, make it possible to meet the requirements for working conditions and safety of the patient. For example our Sinne-bêdsje: **innovative, safe and with side rails sliding away under the lying surface in their lowest position.**

This allows parents to sit relaxed and closer to their child and provides the nursing staff with more manoeuvrability.

**The height-adjustment** of about 96 to 76 cm by hand using a smooth, running lever, or even more easy, electrically. Optimal space for treatment is provided if the end sections are removed. The Sinne-bêdsje has been extensively tested in practice and complies with the **international standards**.

## Numerous possibilities

The Sinne-bêdsje already represents a highly comprehensive solution in the standard version. To increase the functionality of the bed even more, you can choose from many extras

### Standard:

- Mechanical height-adjustment
- Tilttable base with gas spring support
- Central wheel lock including steering wheel
- 150 mm diameter castors, including one anti-static castor
- Removable and interchangeable end sections (bars or plexiglass) at head end and foot end
- **Side rails that slide away under the surface of the bed and gas spring-supported height-adjustment**
- Child-proof operation of side rails
- Side rails adjustable in 3 positions: high, half-high and low
- **Highest position of side rails 800 mm**
- **Distance between bars 60 mm**
- Choice of bed length of 120 cm or 150 cm
- Fastening brackets for restraining systems

### Optional:

- Electrical height-adjustment
- Side rails adjustable in 2 positions: high and low
- Urine bag holder
- Accessories holder
- Drip holder
- Storage basket
- Mattresses
- 2-Section mattress base
- Push/pull handle at head and foot ends
- Attachment tubes for electric drip pumps
- Mattress base with gas spring supported tilt and reverse-tilt
- Fixed height (not height-adjustable)
- DIN-rail

Foot-operated side rails  
150 mm Ø castors

Foot-operated central wheel  
lock/steering wheel function

Side rails adjustable in 3  
positions: high, half high and low

Mattress base with gas spring  
supported tilt and reverse-tilt

Impact shock buffer

Mechanical height-adjustment  
Optional: electric

Side rails sliding away under  
the lying surface and gas spring  
supported height-adjustment

Removable and interchangeable  
end sections (bars or plexiglass)  
at head and foot ends
